DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 1, for example, recites the broad recitation "at most 0.0005 %", and the

Art Unit: 1621

claim also recites "preferably less than 0.0002 %" which is the narrower statement of the range/limitation. Note that claim 3 have the broad language "aliphatic alcohol containing 1 to 4 carbon atoms" followed by the narrow recitation "preferably ethanol".

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 05-301884 A. The '884 JP patent discloses the preparation of platinum complexes, particularly oxaliplatin, wherein after the formation of the diaquo-(trans-1,2-cyclohexanediamine)platinum(II) (made by the addition of silver nitrate to dichloro-(trans-1,2-cyclohexanediamine)platinum(II) and removing the solid silver chloride) the filtrate was passed through a reverse osmosis membrane followed by concentration of the filtrate, decolorization and treatment with oxalic acid. The oxaliplatin product contains 0.3 ppm Ag^+ , 5 ppm NO_3^- and <1 ppm K^+ . See the Table at page 5. Note that 1 ppm corresponds to $\text{weight \%} \times 10^4$, or, $\text{weight \%} = (\text{amount in ppm}) \times 10^{-4}$. Taking 0.3 ppm Ag^+ , for example, corresponds to 0.00003 weight % Ag^+ , which reads on claim 1.
